

The unique Railix makes it possible to partition spaces with sophisticated design.

Railix can be used for custom needs, is easy to maintain, is protected from damage and deters theft. An elegant, friendly and therefore cost-saving room solution with a great deal of creative freedom.

Create your own Ambience

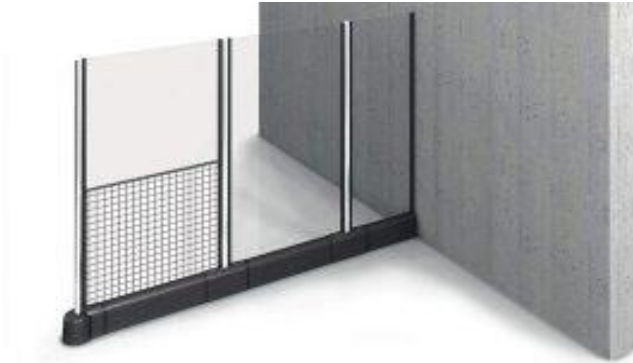

With Railix you can give each room its own individual feel. Variable partition elements can be used to implement a host of creative ideas – also in wood or other materials if you wish to screen a specific area from view.

Reducing Stocktaking Differences

The totally gap-free connection between partition elements and uprights provides perfect protection against shoplifting. Not even the smallest of items will fit through.

Enjoy the Freedom

Installation of the system elements is fast and simple. The uprights in various styles together with the freely combinable partition elements and the cleverly coordinated connection fittings offer great scope for creative solutions.

Safeguard your Property

Base elements with a flush floor connection are integrated to protect the partitions against damage caused by shopping trolleys. The H-shape snap-in profile can be mounted individually as a bumper at the trolley height on request.

Simplify Cleaning

The flush floor connection of the Railix system makes the partitioned area extremely easy to clean – both manually and with machines.

Draught Exclusion

The draught-proof Railix elements safeguard your staff against harmful draughts in the sales area or at checkouts, minimising staff use of sick leave.

Railix Colour

- An attractive feature in the entrance area
- Effective division of spaces
- Energy-saving LED technology in various colours

The partition system is fitted with an energy-saving, long-life LED light unit. The colours and the different colour gradients can be individually selected by remote control to suit any branding or interior design requirements.
