

Railix Security partition system contain a rectangular base profile, forming the foundation for this sturdy and sophisticated entity.

The Railix security offers a high-quality and proven partition system for optimal screening. Its sleek design enables quick and easy installation that can be customised to suit individual requirements.

Transparent acrylic glass elements effectively separate the different areas and offer enhanced security protection with full visibility.

Clear

Transparent acrylic glass elements effectively separate the different areas and offer enhanced security protection with full visibility.

Inventory differentials

The acrylic glass elements close fully with no gaps, effectively making shoplifting, manipulation and tampering difficult.

Sturdy protection

The rectangular base profile provides protection and is resistant to high levels of stress placed on the transparent glass panels.

Cleaning

The flush floor connection makes the partitioned area particularly easy to clean, regardless of whether cleaning is carried out by hand or using a machine.

Bases, partition elements Design

Bases made of steel tube with base plate. Plastic insert profiles in RAL 7047, anthracite grey. Rectangular base profile made of high-gloss chrome-plated steel. Partition elements made of acrylic glass, transparent, 9095.

Finish

High-gloss chrome-plated bases.
