

The Railix Colour partition system creates an elegant and trusted entrance that can be expertly incorporated into a high-value retail setting.

The Railix colour access control system allows an opportunity to strengthen your branding through LED lighting as well as ensuring an unmistakable appearance to your store front.

If you are looking for a combination of security and elegance, look no further than the Railix Colour access control system.

Dramatic

Acrylic glass elements direct the coloured light and create openness and transparency.

LED inside

The colours and the different colour gradients can be individually selected.

Inventory differentials

Perfect protection against shoplifting. Completely closed with no gaps, up to a height of 2 m.

Protection

Plinth and corner elements, as well as plinth profiles, provide perfect protection against damage caused by shopping trolleys.

Cleaning

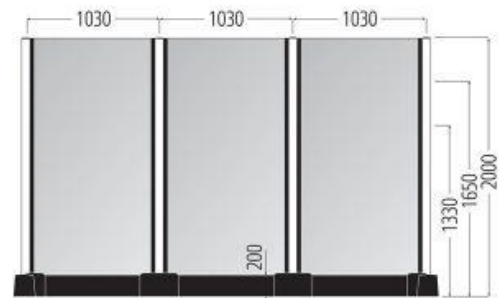

The flush floor connection makes the partitioned area particularly easy to clean, regardless of whether cleaning is carried out by hand or using a machine.

Bases, partition elements

Design

Bases made of steel tube with base plate. Insert profiles, plinth and corner elements, plinth profiles and plastic wall fastenings in RAL 7016, anthracite grey. Acrylic glass partition elements.

Finish

Bases with high-gloss chrome-plated finish, coloured plastic powder coating or stainless steel.
